✅ EXPERIENCE

Scribeware
Lead Mobile Developer
April 2023 - September 2023

Executed major version upgrade for a multiplatform React-Native/React app with Firebase backend and heavy data-sync requirements.

Implemented new components, customized libraries, removed performance bottlenecks, harmonized large codebase for code re-use and long-term maintainability. (This role was a 6-month contract.)

Podzilla
Senior Full-Stack Engineer
January 2019 - March 2023

Full system architecture and implementation for "podcatcher" mobile app built in React-Native using AWS serverless back-end (Lambda, DynamoDB, Cognito, S3, API Gateway...).

Designed public-facing UI/UX, automated test suite, error handling for often-funky public RSS feeds.

Evil Genius Technologies
Lead Mobile Developer
December 2010 - April 2017

Led the design and implementation for dozens of iOS apps for domestic and international clients, typically small to mid-size businesses and nonprofits without in-house developers.

Full-stack coding (and dev-team oversight) using primary tech stack: Objective-C, AWS, .NET, SQL Server, Responsive CSS, API integrations per client specs.

Smart Drug Smarts
Podcast Host + Producer
December 2012 - June 2018

Headlined a weekly podcast back before everyone had a podcast. Over 5 million downloads, eventually reaching ~35,000 per week.

Associated programming included a highly-custom Wordpress site (PHP, MySQL) and a dedicated iOS app (Objective-C).

Antibody Films
Film Producer
November 2005 - January 2011

Financed and produced "schlock" films in genres ranging from kids comedy to zombie horror.

Led technical editing + visual effects teams and online marketing with then-current tools (ASP.NET, Wordpress, etc.).

♡ HUMANITY

When not at the computer, I have bicycled cross-country from San Diego to Florida, climbed the highest mountain in the lower 48 states, and organized zombie flash-mobs in Los Angeles.

I am occasionally mistaken for Trent Reznor.
